**INTEPLAST GROUP**<sup>®</sup>

*Inteplast Group has more than 50 business locations in North America, encompassing manufacturing, distribution and sales locations, 4 business locations in Asia, and strong international sourcing capabilities.*

## ABOUT INTEPLAST GROUP

### *Manufacturing Excellence*

Inteplast Group, established in 1991 and headquartered in Livingston, NJ, is a leading manufacturer of quality products made with plastics. Our markets are wide and synergistic, ranging from packaging to construction to healthcare to foodservice to sanitation and more.

We invest in and support the strength and competitiveness of American manufacturing. That tradition is central to our existence. Continual improvement, value creation, sustainability, and proactive customer service are deep rooted in our company culture.

We manufacture such a wide breadth of quality patient, measurement, collection and containment products, including can liners and specialty bags, that we have united them as one highly focused business unit, **Inteplast Healthcare**.

Now, our Healthcare customers can take full advantage of our products, manufacturing strength and industry expertise.

Thank you for learning more about us, and how **Inteplast Healthcare** can boost the health of your procurement and your bottom line.

- Patient/Resident Mobility Aids, Crutches, Canes and Walkers
- Customized Bags of All Types that Feature Your Logo to Build Your Brand

*We offer the widest range of quality patient, measurement, collection and containment products in the marketplace today.*

*Our companies include:*

## MEDEGEN MEDICAL PRODUCTS

Medegen Medical Products is a primary manufacturer and provider of a broad range of vital daily-use products for Acute Care and Alternate Care facilities.

We are the largest provider of Patient Products in the marketplace, with US-based manufacturing plants in Tennessee and West Virginia, and strong international sourcing capabilities.

Our **Patient Products** include water service and basins, bedpans and urinals, emesis basins and bags, crutches and canes and more. For **Laboratory and Measurement** we offer specimen containers, specimen collectors and graduated measure products. Our **Containment Systems** for biohazard and non-biohazard waste include autoclave bags, sharps containers and can liners. We serve your **Operating Room** product needs with sterilizable bowls and basins; protective gowns, masks, shoe coverings and more.

The Medegen name has long been associated with quality, innovation, reliability and cost efficiency. That tradition is even stronger today with the gain of Inteplast's global supply chain and commitment to ongoing capital investment.

## MINIGRIP®

*Minigrip is a leader in the innovation, manufacture and sale of reclosable zipper and adhesive closure specialty bags for the laboratory and healthcare markets.*

Minigrip's world class global manufacturing, US warehousing and valued features generate industry leading "lowest costs in use".

Minigrip introduced the first reclosable zip bag, featuring the trademark **Red Line™** graphic, in 1959. For more than 25 years, laboratories and hospitals have trusted Minigrip's leading, FDA registered **Lab Guard®** Reclosable Specimen Bags and **Speci-Gard®** Adhesive Closure Specimen Bags.

Minigrip® bags have **cost-saving features** you can only get from Minigrip:

- Patented **TearZone®** easy open system
- Liquid-tight **Color Line™ Double Zipper**
- Innovative **Destroyable Biohazard Symbol**
- Liquid-tight **Press-and-Close®** adhesive closure system.

Promote your brand with **custom bags** that include Minigrip features, brand-specific printing, custom sizing, pocket features, and closure combinations. Rely on Minigrip to deliver all of your **specimen bag, patient belonging bag, patient care bag, standard zip bag** and **specialty bag** needs.

## INTEPLAST IBS INTEPLAST/PITT

*Inteplast Group is the nation's largest manufacturer of can liners and trash bags. Inteplast's Integrated Bagging Systems (IBS) Division and Inteplast/Pitt lead the way in can liners for the healthcare industry.*

You will find no better resource than **Inteplast Healthcare** for ensuring can liner fitness for use and maximizing cost efficiencies. We have the right can liner size, style, strength and color for the broadest range of applications.

Our complete line of **commercial and hospital can liners** includes high density, linear low density, light duty and heavy duty. Our products include color coded, printed bags for **Infectious Waste, Infectious Linen and Non-contagious Linen** management. Our printed **Isolation Bags** are imprinted in both English and Spanish.

Complete sanitary management is available in a full range of sizes and strengths that feature the multi-layered star seal and superior puncture resistance. Inteplast/Pitt and IBS offer green solutions, such as coreless rolls and bags with recycled content, and custom bags and film for non-standard criteria.

## NATIONWIDE FIELD SALES TEAM

You may know many of our sales representatives already. That's because they are tenured healthcare supply chain professionals dedicated to serving your local area.

You'll find our field sales representatives to be valued partners with the in-depth industry and product knowledge necessary to clearly understand your needs, support your goals, and drive results.

Your **Inteplast Healthcare** representatives specialize in identifying optimal product utilization opportunities. They will provide the right products to meet your clinical and financial objectives and are top resources for achieving product-related initiatives throughout your hospital/IDN.

### Benefits:

- National strength, local attention and service
- Broad GPO coverage with preferred pricing
- Exceptional product expertise
- Product utilization and standardization assessments
- Identify and deliver cost savings
- Consolidate product ordering and reduce waste
- Trusted, reliable resource dedicated to serving you
